

Develop a wireframe for an application using any one software tool. Choose an application on your own. The wireframe should at least consist of ten-page layouts. Ans—**E-VOTING SYSTEM APPLICATION**

Speaker symbol is to be clicked for voice assistance or for people with low vision and blind people. On clicking it the app moves to screen no. 7. Otherwise screen 2 comes on clicking "SELECT LANGUAGE".

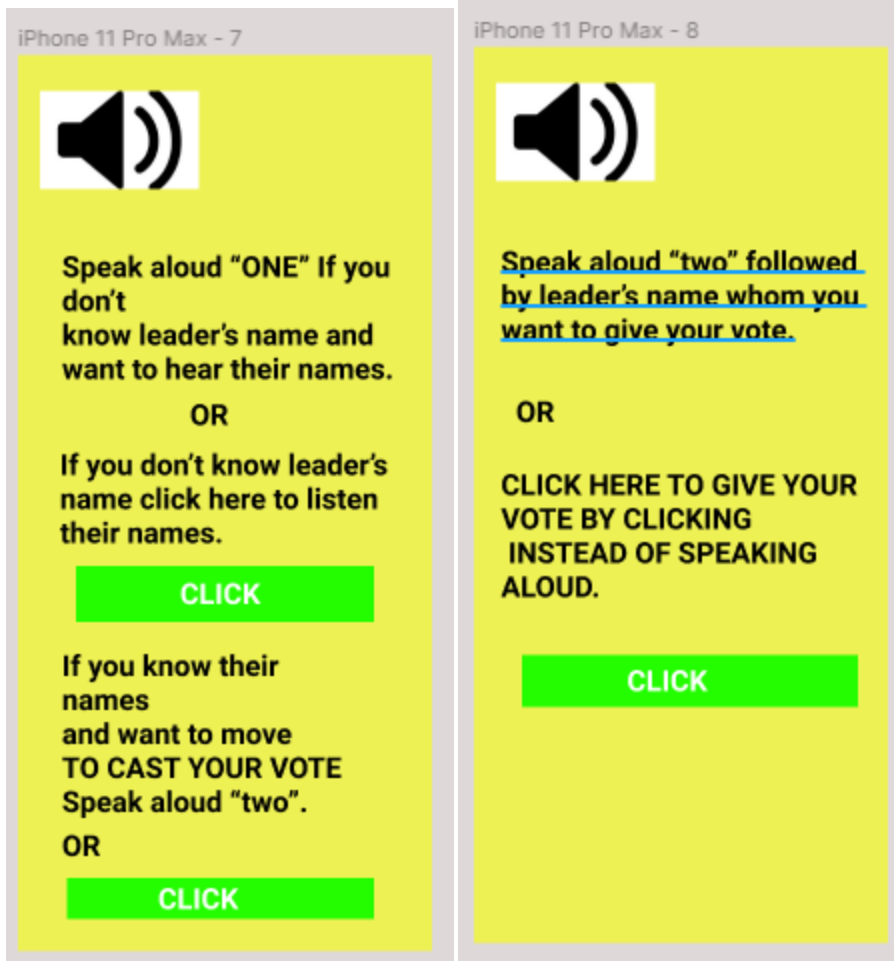

On clicking first click of screen 3 app moves to screen 4.

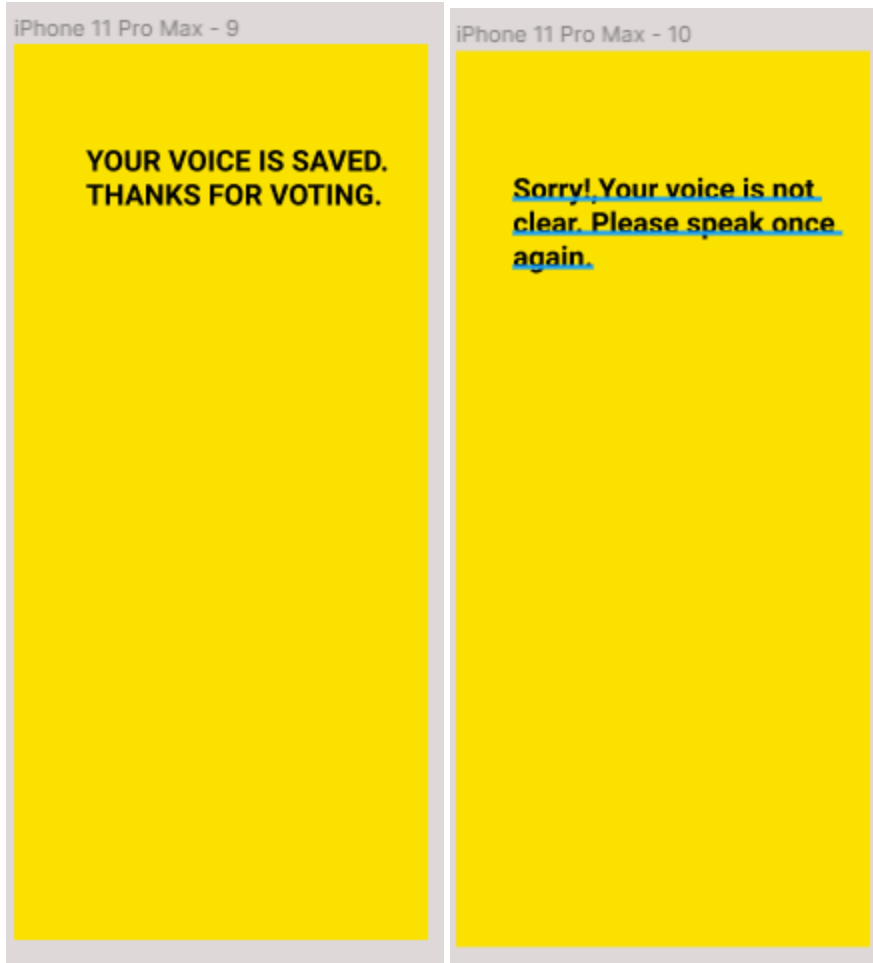

Otherwise it moves to screen 5.

After vote is casted on screen 5, app moves to screen 6.

On screens 7 and 8 the user can speak also can click to cast their vote.

If voice is not clear or there is disturbance in surroundings then app moves to screen 10 and then to screen 9 and screen 6. Otherwise it moves directly to screen 9 and screen 6.
